DIN RAIL CHANNELS

“HEX” offers a complete range of DIN RAILS for the mounting of terminal blocks, MCB's etc. These steel rails are manufactured from cold roll low carbon steel and processed in various types through rollforming. The finish is zinc electroplated with yellow, white or blue passivation. Also available with white / blue passivation, as per RoHS compliance, against specific order.

All rails are available in 1 mtr. & 2 mtr. length and in three types ie. Plain (P), Punched/Dotted (D) & Slotted (S).

While ordering add the type :

P for (Plain), D for (Dotted/Punched) and S for (Slotted).

DMC BUS BAR SUPPORTS / INSULATORS

- “HEX” manufactures a wide range of DMC insulators for Control Panels, Boards etc. in various types viz. Conical, Cylindrical, Hexagonal, Hex-Cylindrical.
- The Sizes range from the height of 25mm to 75mm. The extruded brass insert varies accordingly from M6 to M12, for the fixing of insulators.
- “HEX” insulators have excellent electrical and mechanical strength, heat and flame resistance and a very low water absorption capacity.
- All “HEX” insulators have successfully withstood the tests carried out by reputed test labs.

HEX high quality PVC Channels adhere to international standards in all processes of manufacturing, thus ensuring a product which meets the highest level of Quality & Safety. The Salient features are :

- Made of rigid polyvinyl chloride (PVC) of high tensile & compressive strength.
- Highly durable, will not crack, peel or chip, also resistant to oil, fungus, salt solutions etc..
- Non brittle, non inflammable and also warp proof.
- Fast & efficient locking guaranteed because of specially designed duct & cover.
- Slotting pattern prevents wire from popping up, while removing cover.
- Elongated slots at the bottom makes flexible mounting possible.
- Special orders regarding colours, length or modification of existing range can be manufactured as per your Spec.

WELD STUDS

HEX manufactures a wide range of Speciality Fusion Weldable Fasteners, Autoweld Studs, Hardwares used for Stud Welding

Product Range : Drawn Arc type, Capacitor Discharge type, Short Cycle type, Break Off type, in various Diameters, Shapes, Materials & Length.

Also as per customers requirement with or without thread.

Material : MS, SS, Aluminium, Brass, etc.

Sizes : M3 to M20 (also available in imperial sizes)

Finish : Natural, Nickel, Copper, Zinc etc. (as per customers requirement)

Accessories : Ceramic Ferrules can be provided

HEX Welding Studs have been made to withstand Bend test, Torque test and Tensile Strength test as per specifications.

The above shown terminals and products, built to International Standards, are supplied to leading manufacturers of Switchboard , Switches , Transformers , Battery , Switchgear , Terminal Blocks, Distribution Boards , Panel Builders etc. all over the world.

HEX an ISO certified company is amongst the leading manufacturers of electrical accessories. HEX has been providing its services to customers from all over the world for the past decade. Our experience, along with the latest technology, allows us to provide superior service to the electrical industry , in both hazardous and non-hazardous areas of electrical installation.

“HEX” has specialised in developing components and terminals in ferrous and non-ferrous metals as per the customer’s design and specifications. We possess the capacity to develop and manufacture tailor made items, as per the customer’s requirements, on the basis of the design and specifications given to us.

We also make Moulds & Dies for
Various Plastics, Bakelite, SMC & DMC Components.
