The Company

In 2002, the organization appeared with an objective to make things easier and life simpler. GM believes that the hard working world deserves a less complex life. And the human struggles need to decrease through simple access to automation.

GM redefined switch manufacturing in India. From switches to home automation, for more than a decade we have been catering "better lives" to our customers across the country. By introducing innovation, GM incorporates advanced and imaginative products that transformed people's lives tremendously. At GM, we believe in constant innovation and we are the market leaders in switches and other home electrical accessories.

Founded in 2002, we have been in the forefront of home electrical solutions. We made space for good technology for every home by introducing some revolutionary products like new generation switches, home automation, Bluetooth music players, home security products, switchgears and brilliant contemporary range in LED lighting and luminaires.

Our innovations are the result of a strong research & development team, which is further complimented by an equally dedicated, and capable product design team. Our state-of-the-art manufacturing facility is spread around 2.5 lakh square feet with the most efficient and high-grade machinery that produces the finest quality products that carry the GM logo.

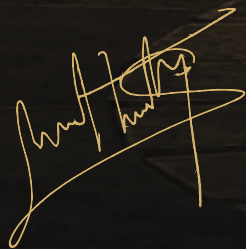

Welcome to the most luxurious experience

I was always fascinated by GM's idea of luxury and therefore this successful association. Luxury is one brilliant idea. That one idea that further helps to elaborate creating functional products. GM understands how important experiences are, and that is what we inculcate in our designs. FourFive is about classic timeless forms to unconventional designs, we find inspiration from everything.

Being GM's brand ambassador, I believe that luxury is that state of mind where experiences aid in creating the right mind-set. GM's motive of offering convenience to a million, got my instant consent of collaboration. Moreover, with our passion towards our work, the excellence in creating products of exceptional quality, I can relate with my belief of giving it my all for that one perfect shot.

With all my heart, I welcome you to have the most luxurious GM experience.

COLOURS & MATERIALS

We respond instantly and instinctively to colour. The hues of orange give you the warmth and the shades of blue that cools your mood. Red that excites the passion and white that settles you in peace. Colours have that energy to make a design speak.

Article and cover plates Customization

Often, the market requests the possibility to personalize the front part of the covers with symbols or inscriptions, or the personalization of the front plates with identifying marks. These marks are required to enhance the prestige and image.

GM offers the possibility to produce inscriptions, symbols, logos or special marks on the articles or cover plates. The personalization is done by laser technology. Laser technology allows the reproduction of any name, logotype or trademark, with absolute precision and indelibility even for small quantities.

SIGNAGE SLIDE (AA 3 123 MA)

Request of Customization

- Cover plates and Smart card - Please supply the image in EPS or TIFF format through e-mail/CD.
- Edge Glow LED Signage Slides - While ordering engraving of customized symbols on slides, wherever possible, reference should be made of the product code along with the number of symbol. (e.g. AA 3 123 MA / AA 3 161 MA means signage edge glow square slide with EXIT direction symbol).
- Please contact the customer service department for feasibility, quality and delivery time.

Hospitality is the defining aspect of customer satisfaction as it's all about quality products & services. Signage solutions play an important role in communicating clear directions, amenity information and visual guidance to visitors. Hospitality covers plenty of fields under its shelter like hotels, restaurants, motels, malls, theatres and so on. We understand that providing good quality products often help a client patronize the respective establishment, because we believe that what you serve often reflects what you are.

Smart solutions for hotel and hospitality signage applications.

Lights to accentuate and impress

The future of living standards is more about an ecological and culturally satisfying world. In recent years we have seen the capacity and opportunity of utilization of given resources. GM takes the liberty of innovating LED technology with its LED lighting and luminaires with regular down lights, panel lights, surface lights and other residential and industrial applications.

Notes

To make a better world, make life simpler.

It is what we strongly believe in. It is not just about innovating products, it's about everything we do that affects people and environment around us. We find us responsible to do things differently and in a better way. These are few initiatives we have already set into motion.

CLIMATE IMPACT

GM Modular supports the Climate Impact cause. We want to help carve a better cleaner world and that is why we started a strategic policy initiative. We are committed to align operations and strategies with environment friendly principles.

RECYCLE

We constantly find ways to make more out of less. That is why we try our best to use a recyclable resource. From tiny metal pieces to whatever that can harm the environment in reproducing, we reuse it.

LESS TRANSPORT

We have regional distribution centres spread across the country. In order to reduce the distance that our products have to travel to reach our customers, we have distribution centres with our channel partners to cut down on the transportation distance that helps curb CO2 emissions.

BETTER HOME ENVIRONMENT

A good home environment is important for your health and well-being. It is not only the ventilation and construction materials, but also the things you have inside, that influence the indoor environment of your home. GM refrains from using any harmful raw material that may cause unhealthy circumstances to life.

CERTIFIED

To help consumers make qualified decisions in choosing products that contribute to a healthy lifestyle, GM products have received safety certifications from around the world, as they have been tested thoroughly with regards to their functioning.

Harmonizing design and technology

The GM product range sets standards in design, function and technique. GM offers high-quality design, attractive colours and numerous intelligent functions with switches and automation.

Our intent is to raise the quality of life and therefore, all products are designed to harmonize perfectly, with each other. From switches to socket outlets, from music technology to home automation, the use of GM products is not only attractive, but also convincingly comfortable. Having clear operating instructions in our packaging with the most important technical data assists in the safe and faultless installation of every GM product.
